

# Manuals and Specifications – Simple Hinglish Summary

Source: <https://javascript.info/manuals-specifications>

## Main baat

Ye tutorial aapko JavaScript **step-by-step seekhne** me help karta hai. Basics aane ke baad aapko **dusre resources** ki zarurat padegi. Ye page unhi resources ke bare me hai.

## 1. Specification (ECMA-262)

- Ye JavaScript ki **official rulebook** hai. Isme language ki sabse detailed aur sahi information hoti hai.
- Ye bahut formal hai, isliye shuru me samajhna mushkil hai. **Roz ke use ke liye nahi hai.**
- Jab kisi cheez ki 100% pakki jankari chahiye, tab ye best source hai.
- Har saal nayi version aati hai. Beech me latest draft yahan milta hai: <https://tc39.es/ecma262/>
- Naye aur upcoming features (proposals) yahan milte hain: <https://github.com/tc39/proposals>
- Browser ke liye aur bhi specifications hain, jo tutorial ke second part me cover hoti hain.

## 2. Manuals (MDN)

- **MDN (Mozilla) JavaScript Reference** sabse popular manual hai. Isme examples ke saath har function/method ki detail milti hai.
- Link: <https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference>
- **Tip:** Google me seedha likho "**MDN parseInt**" (ya koi bhi term). Ye sabse fast tarika hai.

## 3. Compatibility Tables

JavaScript me naye features aate rehte hain, to check karna padta hai ki wo **sab browsers me challenge ya nahi**.

- **caniuse.com** → har feature ka browser support table.
- **kangax.github.io/compat-table** → language features aur unko support karne wale engines ka table.

## Quick Summary

| Kaam                                         | Kahan dekhein              |
|----------------------------------------------|----------------------------|
| Language ke exact rules                      | ECMA-262 Specification     |
| Function/method ka example ke saath samjhana | MDN                        |
| Feature browser me chalega ya nahi           | caniuse.com / compat-table |
| Naye upcoming features                       | tc39 proposals             |
